

How to Download and Run ExporterRy

[About ExporterRy](#) - [Downloading ExporterRy](#) - [Starting ExporterRy](#) - [Using ExporterRy](#)

About ExporterRy

ExporterRy is an independent exporter for Ryver.com.

With ExporterRy you can export Tasks, Topics, and Chats from your Ryver organisation's Teams and Forums.

Data is exported in JSON and HTML formats, and can be kept as a backup, or used in other processes.

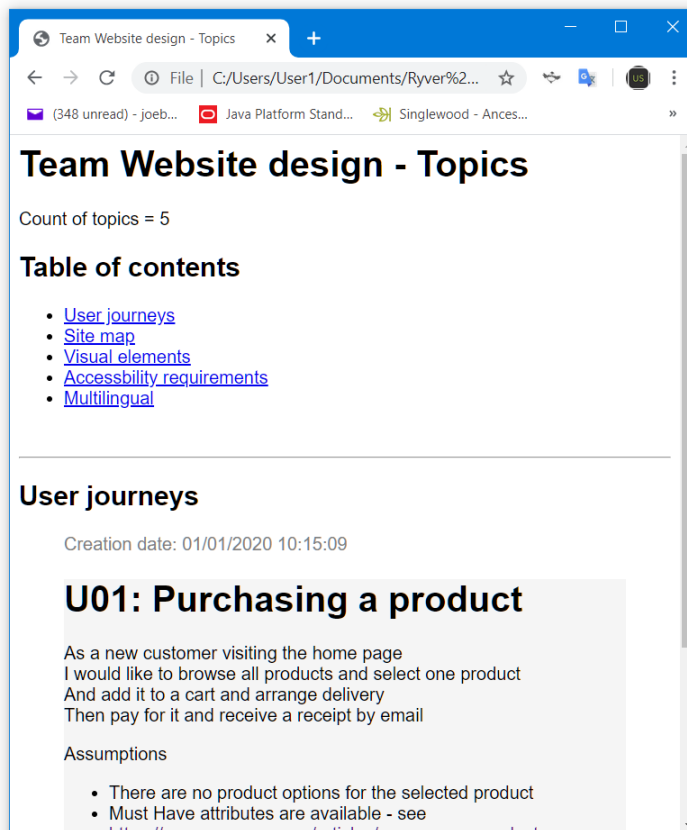

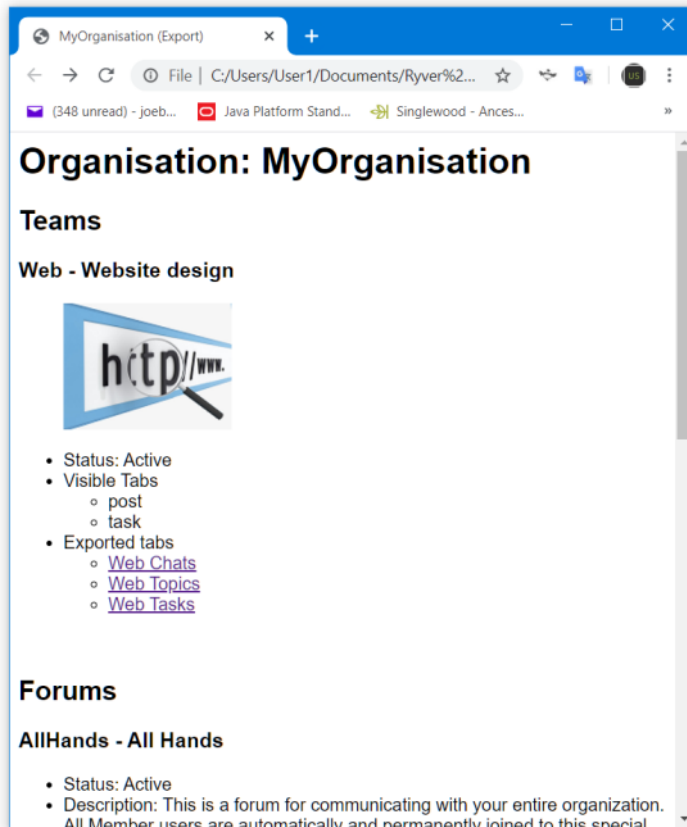

For details of what data is and is not exported, please refer to <https://utilitysoftware.store>

Example JSON output:

```
C:\Users\User1\Documents\Ryver Export\Ryver Export - Myorganisation - 2020-01-02-192655\json\RyverInfo.json - N

Example HTML output:

Downloading ExporterRy

When you purchase ExporterRy for Windows our checkout process will show you a download link. It will also automatically email you the link to download the software.

Example checkout page containing download link:

Example email containing download link:

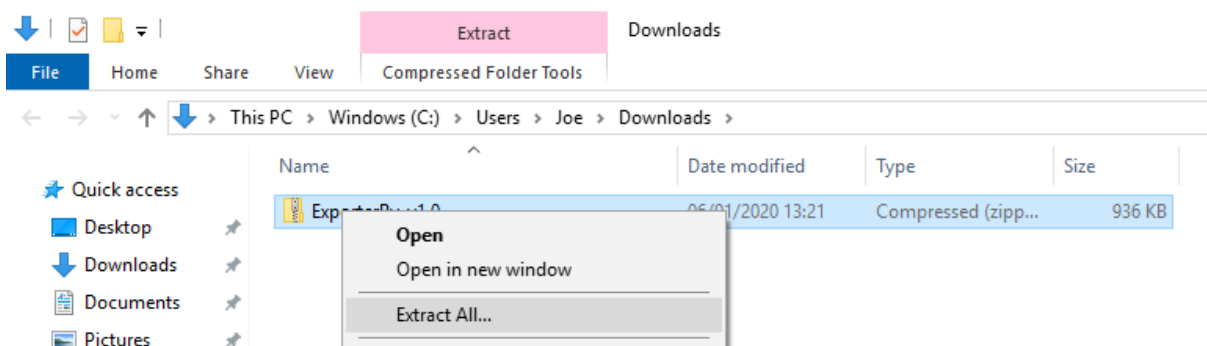

Depending on which browser you use to download the zip file, you may get a warning, like this one from Google Chrome:

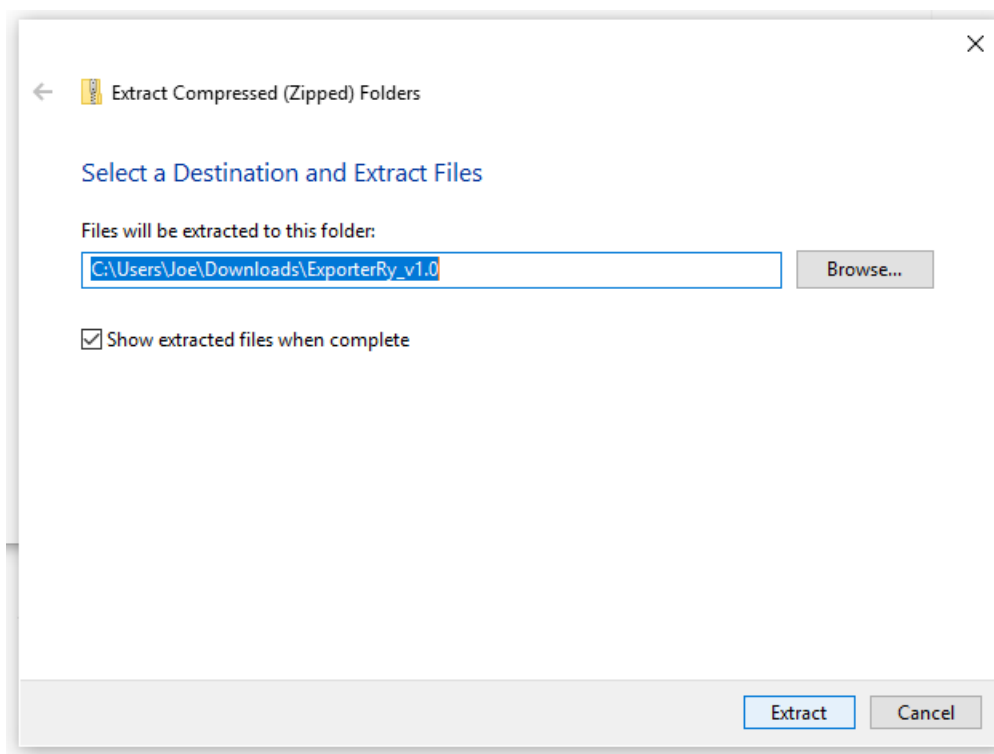

If you see this, click the arrow on the warning and pick “Keep”:

In your Downloads folder, extract the software folder from the downloaded zip:

Click Extract:

Move the ExporterRy_vX.X folder to a folder where you will keep it, like C:\Program Files.

Starting ExporterRy

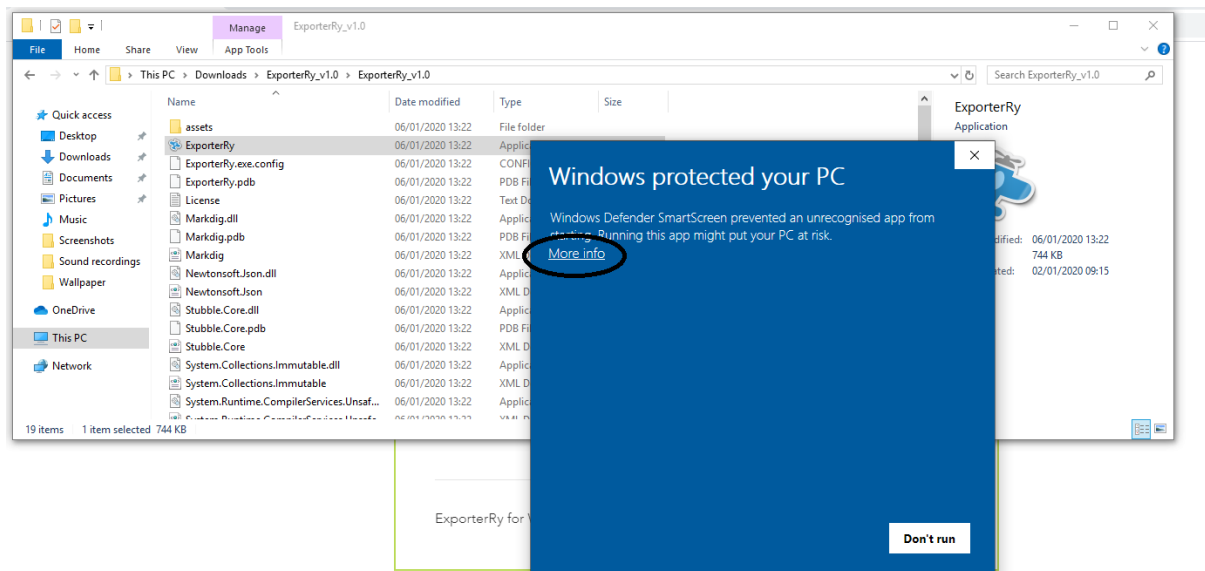

Double-click the “ExporterRy” or “ExporterRy.exe” application icon:

or

Windows may warn you that the application is unrecognised:

This is because there are only a few users of ExporterRy, so Microsoft has not gathered enough stats about it.

Press More Info

Then press “Run anyway”

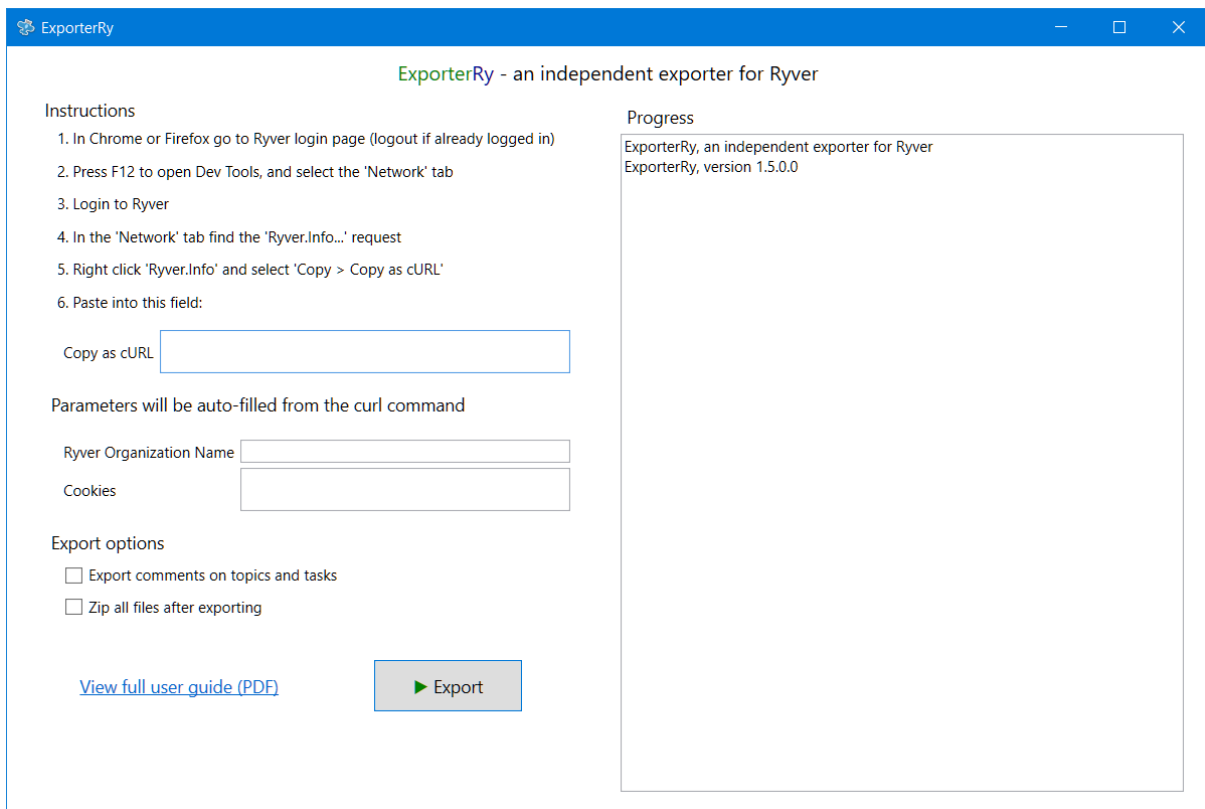

Using ExporterRy

1. Read the Welcome page for more information about how ExporterRy works.

2. Press Next to get to the Parameter and progress page:

3. Provide your Ryver session details to ExporterRy (we will NEVER ask for your password!)

In this step you will provide the browser tokens from an active Ryver session. This allows ExporterRy to communicate with Ryver without having to ask you for your password.

You need to use Google Chrome or Mozilla Firefox:

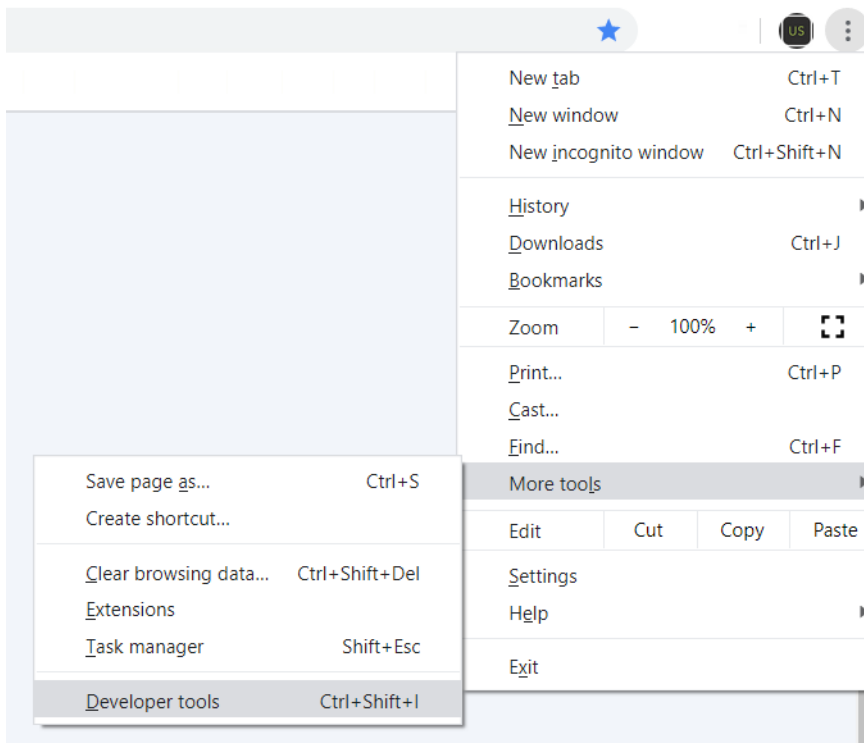

3.1 In Chrome or Firefox go to your organisation's Ryver login page (logout if already logged in)

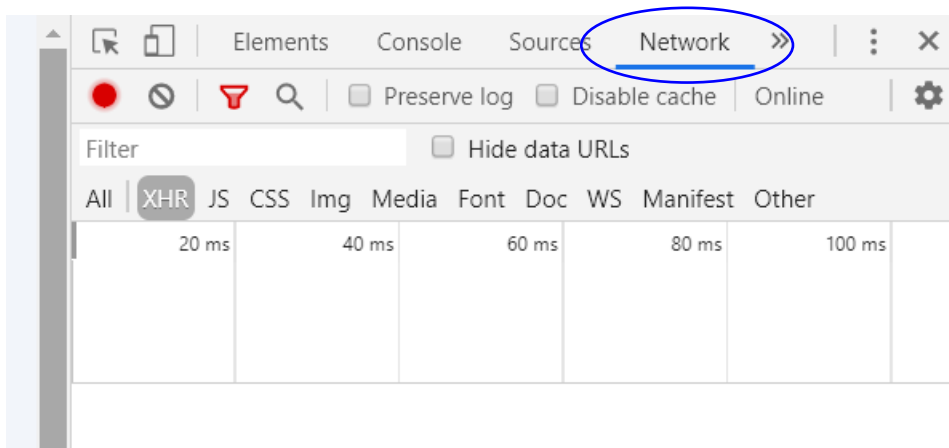

The image is a screenshot of a web login page titled "Log in to Ryver". It features a white background with a light blue border. At the top, the title "Log in to Ryver" is displayed in a large, grey, sans-serif font. Below the title, there are two input fields. The first field is labeled "Username or email" and has a blue '@' icon to its left. The second field is labeled "Password" and has a blue padlock icon to its left. Below these fields is a prominent blue button with the text "Log in" in white. At the bottom of the form, there is a checkbox labeled "Remember me".

Do not login yet.

3.2 Press F12 to open the browser's Developer Tools, or go to More tools > Developer Tools in the browser menu:

3.3 Select the 'Network' tab

3.4 Login to Ryver

Now you can login.

Using the same browser window, login to Ryver as you normally do.

3.5 In the 'Network' tab find the 'Ryver.Info...' request (hint, pressing the XHR filter button may help reduce the number of items to look through).

<input type="checkbox"/>	User.Login(client... /api/1/odata.svc	200	OK	xhr	app.js?7f...	1.5 KB	2
<input type="checkbox"/>	AP-SESQECHEDE... esp.aptrinsic.co...	200	OK	xhr	aptrinsic.j...	1.3 KB	5
<input type="checkbox"/>	Ryver.Info()?%24... /api/1/odata.svc	200	OK	xhr	vendor.js?...	4.2 KB	3
<input type="checkbox"/>	Tabs.GetState()?... /api/1/odata.svc	200	OK	xhr	vendor.js?...	1.9 KB	2
<input type="checkbox"/>	command?v=AP... esp.aptrinsic.co...	200	OK	xhr	aptrinsic.j...	497 B	2
<input type="checkbox"/>	command?v=AP...	200	OK	xhr	aptrinsic.i	497 B	2

3.6 Right click 'Ryver.Info' and select 'Copy > Copy as cURL'

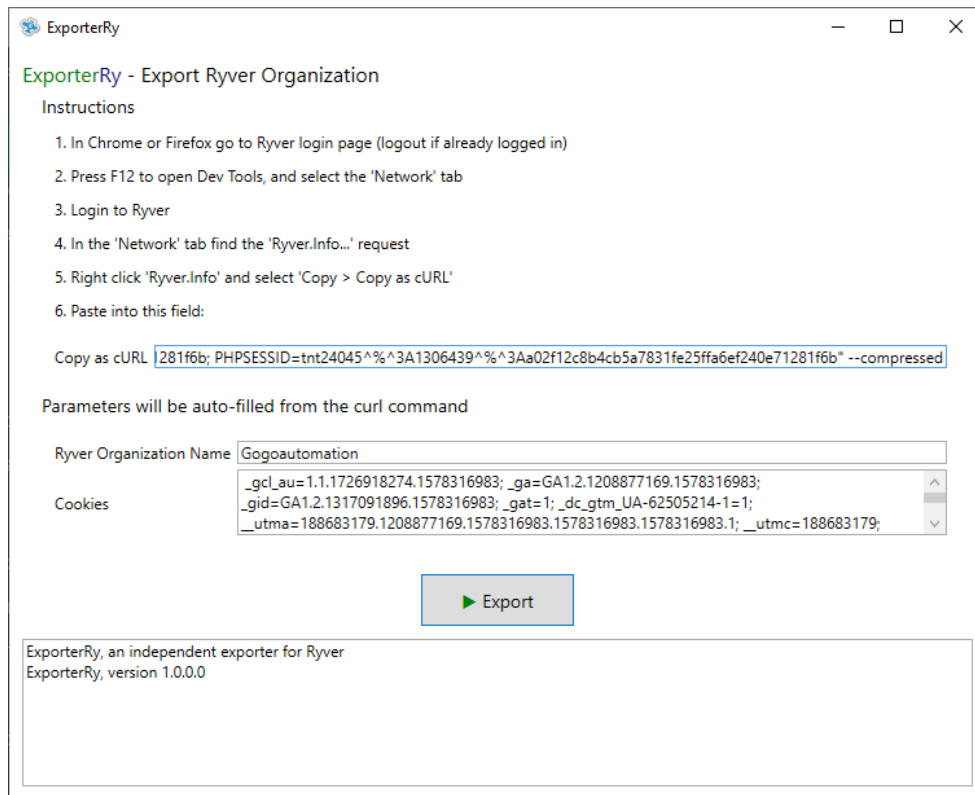

The screenshot shows a network request list with a context menu open over the 'Ryver.Info' request. The 'Copy' option is selected, and a sub-menu is open showing 'Copy as cURL (cmd)' as the chosen option. The 'Copy as cURL (cmd)' option is circled in blue.

<input type="checkbox"/>	Ryver.Info()?%24f...	200	OK	xhr	vendor.i	4.2	370...

<input type="checkbox"/>	auth	200	OK	xhr	voice.js?...	858 B	E

40 / 87 requests | 197 KB / 7.1 MB transferred | 209 K

3.7 In ExporterRy, click the 'Copy as cURL' field and right-click and Paste, or press Ctrl+V

ExporterRy will find your organisation name and session token cookies and automatically populate those.

4. Press Export

ExporterRy will now connect to Ryver using your active session, and export the Tasks, Topics, and Chats from the Teams and Forums in your organisation.

5. After export

When complete, it will automatically open the root HTML web page of the exported data.

You will find the exported data in Documents\Ryver Export.

The progress window will show you the location of the exported data.
